HIP 1-4 Drainage

TO: ALL PROSPECTIVE BIDDERS

DATE: June 22, 2017

1.) Is there an estimate?
   - Yes

2.) Is this RFP part of a site package in advance of vertical construction of a project known as the Habersham Industrial Park?
   - Not part of a vertical package

3.) Is the vertical a private project?
   - Not part of a vertical package

4.) Is there a construction manager for the project on board?
   - Public Works Director & Building/Planning Director

5.) With the Storm Drain project in Pads 1-4 in the Industrial Park, is the county providing all materials (i.e. brick, grout/ready-mix for structures, etc.) or just structures, pip, and #57 stone?
   - Habersham County will provide brick and bag grout for the connections as well as structures, pipe and #57 stone.

6.) Can the county consider adding a lump sum item where we can put any necessary mob, survey, clean-up, etc. that isn't based off of length of pipe?
   - We will not provide an additional lump sum line item for mob, survey, clean-up, etc. since these costs are not expected to be significant. If you anticipate any incidental costs, I would recommend adding these costs into the LF price for pipe.

7.) The Plan and Profile shows CMP Pipe, and the scope in the RFP states that the pipe is to be HDPE. Can you clarify which the pipe material is to be?
   - The plans currently indicate CMP, however the pipe will be HDPE or "grey" HP pipe.
