Alicia,

Habersham County would like to thank Cindy McGrew for her hard work and dedication as the Contracts Service Engineer for the Public Works and Capital Projects Departments. Cindy's industry knowledge and experience working with County and State governments has had an immediate and positive impact in her position within the two departments. Cindy has constant, productive input in every task she's involved with. This includes researching and qualifying Habersham County for several State and Federal grants that will save several millions of dollars. She has also been a vital asset in assessing cost reduction analysis for various Capital Projects, as well as assuming a major role in implementing a revised Asset Management Program within the County to better inventory and rate County roads, dams, culverts, bridges, and signs. Assertive and qualified employees such as Cindy don't come along every day. We are very fortunate to have people of her caliber!

Respectfully,

Jerry Baggett
Public Works Director / Capital Projects Manager
